

MOUSE IgG2a isotype control Allophycocyanin

Monoclonal IgG2a , Allophycocyanine Catalog # ASR3322

Product Information

Description MOUSE IgG2a isotype control Allophycocyanin Conjugated

Conjugate Allophycocyanine

FP Value 1-2 moles Allophycocyanine per mole of Mouse IgG2a

Clonality Monoclonal IgG2a
Physical State Liquid (sterile filtered)

Host IsotypeIgG2aSpecies of OriginMouseStabilizerNone

Preservative 0.01% (w/v) Sodium Azide

Additional Information

Shipping Condition Wet Ice

Application Note Mouse IgG2a isotype control can be utilized as a control or standard reagent

in Flow Cytometry, Western Blotting, and ELISA experiments where

determination of sample isotype is important.

Purity Mouse Isotype control has been prepared from concentrated cell culture

supernatant by immunoaffinity chromatography using protein A. In an Ouchterlony double diffusion assay the material is non-reactive with antisera to mouse IgG1, IgG2b, IgG3, IgM, and IgA. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Mouse IgG and anti-Mouse

serum. Light and heavy chain composition has been confirmed.

Storage Condition Store vial at 4° C prior to opening. This product is stable for several weeks

at 4° C as an undiluted liquid. Dilute only prior to immediate use. DO NOT

FREEZE. This product is light sensitive.

Precautions Note This product is for research use only and is not intended for therapeutic or

diagnostic applications.

Background

Mouse isotype controls are used in flow cytometry, western blot and ELISA and differentiate between immunoglobulin classes and subclasses. Isotype controls allow for the genetic variations or differences in the constant regions of the heavy and light chains. In mouse there are six relevant heavy chain isotypes and two light chain isotypes: heavy chain a - IgA, ? - IgG 1, 2a, 2b, 3 and \Box - IgM, light chain ? and ?.

Please note: All products are 'FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC OR THERAPEUTIC PROCEDURES'.
