

ATF3 Antibody (monoclonal) (M04)

Mouse monoclonal antibody raised against a full length recombinant ATF3.

Catalog # AT1223a

Product Information

Application	WB, E
Primary Accession	P18847
Other Accession	BC006322
Reactivity	Human
Host	Mouse
Clonality	monoclonal
Isotype	IgG3 Kappa
Clone Names	8G5
Calculated MW	20576

Additional Information

Gene ID	467
Other Names	Cyclic AMP-dependent transcription factor ATF-3, cAMP-dependent transcription factor ATF-3, Activating transcription factor 3, ATF3
Target/Specificity	ATF3 (AAH06322, 1 a.a. ~ 181 a.a) full-length recombinant protein with GST tag. MW of the GST tag alone is 26 KDa.
Dilution	WB~~1:500~1000 E~~N/A
Format	Clear, colorless solution in phosphate buffered saline, pH 7.2 .
Storage	Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.
Precautions	ATF3 Antibody (monoclonal) (M04) is for research use only and not for use in diagnostic or therapeutic procedures.

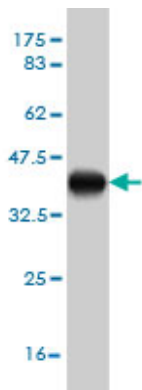

Background

Activating transcription factor 3 is a member of the mammalian activation transcription factor/cAMP responsive element-binding (CREB) protein family of transcription factors. Multiple transcript variants encoding two different isoforms have been found for this gene. The longer isoform represses rather than activates transcription from promoters with ATF binding elements. The shorter isoform (deltaZip2) lacks the leucine zipper protein-dimerization motif and does not bind to DNA, and it stimulates transcription presumably by sequestering inhibitory co-factors away from the promoter. It is possible that alternative splicing of the ATF3 gene may be physiologically important in the regulation of target genes.
