

ATP7B Antibody (monoclonal) (M01)

Mouse monoclonal antibody raised against a partial recombinant ATP7B. Catalog # AT1244a

Product Information

Application WB, E **Primary Accession** P35670 Other Accession NM 000053 Reactivity Human Host mouse Clonality monoclonal Isotype IgG1 Kappa **Clone Names** 3E11 Calculated MW 157263

Additional Information

Gene ID 540

Other Names Copper-transporting ATPase 2, Copper pump 2, Wilson disease-associated

protein, WND/140 kDa, ATP7B, PWD, WC1, WND

Target/Specificity ATP7B (NP_000044, 1372 a.a. ~ 1465 a.a) partial recombinant protein with GST

tag. MW of the GST tag alone is 26 KDa.

Dilution WB~~1:500~1000 E~~N/A

Format Clear, colorless solution in phosphate buffered saline, pH 7.2.

Storage Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

Precautions ATP7B Antibody (monoclonal) (M01) is for research use only and not for use

in diagnostic or therapeutic procedures.

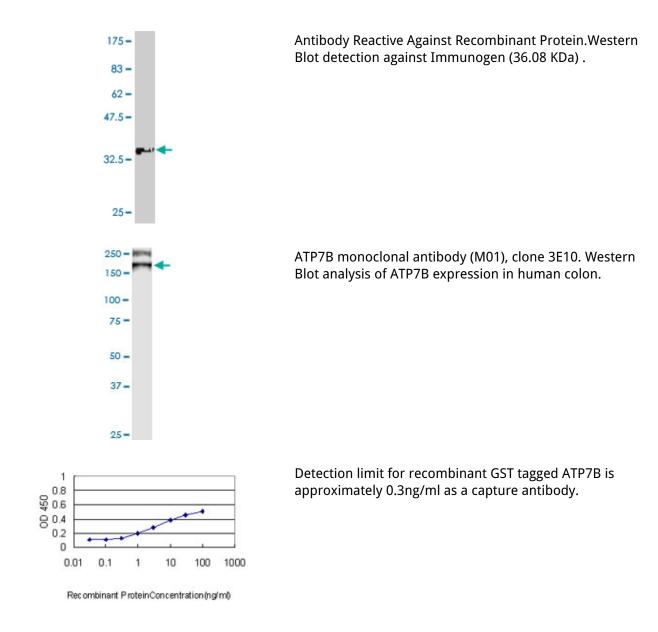

Background

This gene is a member of the P-type cation transport ATPase family and encodes a protein with several membrane-spanning domains, an ATPase consensus sequence, a hinge domain, a phosphorylation site, and at least 2 putative copper-binding sites. This protein functions as a monomer, exporting copper out of the cells, such as the efflux of hepatic copper into the bile. Alternate transcriptional splice variants, encoding different isoforms with distinct cellular localizations, have been characterized. Mutations in this gene have been associated with Wilson disease (WD).
