

CABC1 Antibody (monoclonal) (M03A)

71950

Mouse monoclonal antibody raised against a partial recombinant CABC1. Catalog # AT1361a

Product Information

ApplicationWBPrimary AccessionQ8NI60Other AccessionBC005171

Reactivity Human, Mouse, Rat

Host Mouse
Clonality monoclonal
Isotype IgM Kappa
Clone Names 5A4

Additional Information

Calculated MW

Gene ID 56997

Other Names Chaperone activity of bc1 complex-like, mitochondrial, Chaperone-ABC1-like,

2711-, aarF domain-containing protein kinase 3, ADCK3, CABC1

Target/Specificity CABC1 (AAH05171, 1 a.a. ~ 100 a.a) partial recombinant protein with GST tag.

MW of the GST tag alone is 26 KDa.

Dilution WB~~1:500~1000

Format Clear, colorless solution in phosphate buffered saline, pH 7.2.

Storage Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

Precautions CABC1 Antibody (monoclonal) (M03A) is for research use only and not for use

in diagnostic or therapeutic procedures.

Background

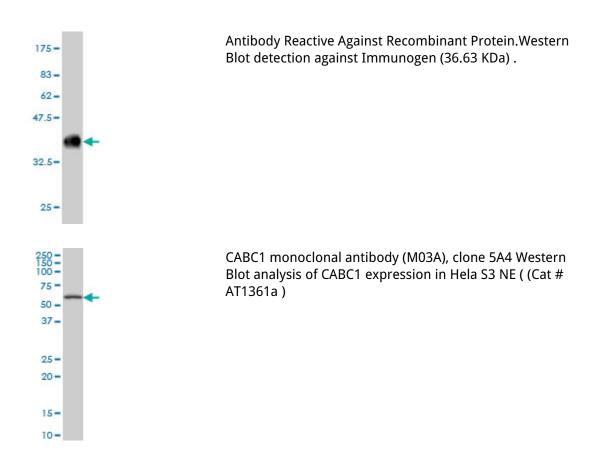

This gene encodes a mitochondrial protein similar to yeast ABC1, which functions in an electron-transferring membrane protein complex in the respiratory chain. It is not related to the family of ABC transporter proteins. Expression of this gene is induced by the tumor suppressor p53 and in response to DNA damage, and inhibiting its expression partially suppresses p53-induced apoptosis. Alternatively spliced transcript variants have been found; however, their full-length nature has not been determined.

References

ADCK3, an ancestral kinase, is mutated in a form of recessive ataxia associated with coenzyme Q10

deficiency. Lagier-Tourenne C, et al. Am J Hum Genet, 2008 Mar. PMID 18319074.CABC1 gene mutations cause ubiquinone deficiency with cerebellar ataxia and seizures. Mollet J, et al.
