

CD81 Antibody (monoclonal) (M01)

Mouse monoclonal antibody raised against a partial recombinant CD81. Catalog # AT1446a

Product Information

Application E

Primary Accession
Other Accession
Reactivity
Human
Host
Clonality
Isotype
Clona Names
P60033
BC002978
Human
mouse
Gundality
IgG1 Kappa

Clone Names 2B7 Calculated MW 25809

Additional Information

Gene ID 975

Other Names CD81 antigen, 26 kDa cell surface protein TAPA-1, Target of the

antiproliferative antibody 1, Tetraspanin-28, Tspan-28, CD81, CD81, TAPA1,

TSPAN28

Target/Specificity CD81 (AAH02978, 25 a.a. ~ 127 a.a) partial recombinant protein with GST tag.

MW of the GST tag alone is 26 KDa.

Dilution E~~N/A

Format Clear, colorless solution in phosphate buffered saline, pH 7.2.

Storage Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

Precautions CD81 Antibody (monoclonal) (M01) is for research use only and not for use in

diagnostic or therapeutic procedures.

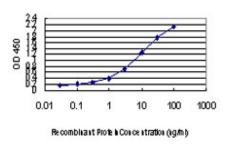

Background

The protein encoded by this gene is a member of the transmembrane 4 superfamily, also known as the tetraspanin family. Most of these members are cell-surface proteins that are characterized by the presence of four hydrophobic domains. The proteins mediate signal transduction events that play a role in the regulation of cell development, activation, growth and motility. This encoded protein is a cell surface glycoprotein that is known to complex with integrins. This protein appears to promote muscle cell fusion and support myotube maintenance. Also it may be involved in signal transduction. This gene is localized in the tumor-suppressor gene region and thus it is a candidate gene for malignancies.
