

CDC14A Antibody (monoclonal) (M02)

Mouse monoclonal antibody raised against a partial recombinant CDC14A. Catalog # AT1456a

Product Information

| Application | WB, IF |
|-------------------|------------------|
| Primary Accession | <u>Q9UNH5</u> |
| Other Accession | <u>NM_003672</u> |
| Reactivity | Human |
| Host | mouse |
| Clonality | monoclonal |
| Isotype | IgG2a Kappa |
| Clone Names | 1F11 |
| Calculated MW | 66574 |

Additional Information

| Gene ID | 8556 |
|--------------------|----------------------------------------------------------------------------------------------------------------------|
| Other Names | Dual specificity protein phosphatase CDC14A, CDC14 cell division cycle 14 homolog A, CDC14A |
| Target/Specificity | CDC14A (NP_003663, 431 a.a. ~ 530 a.a) partial recombinant protein with GST tag. MW of the GST tag alone is 26 KDa. |
| Dilution | WB~~1:500~1000 IF~~1:50~200 |
| Format | Clear, colorless solution in phosphate buffered saline, pH 7.2 . |
| Storage | Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing. |
| Precautions | CDC14A Antibody (monoclonal) (M02) is for research use only and not for use in diagnostic or therapeutic procedures. |

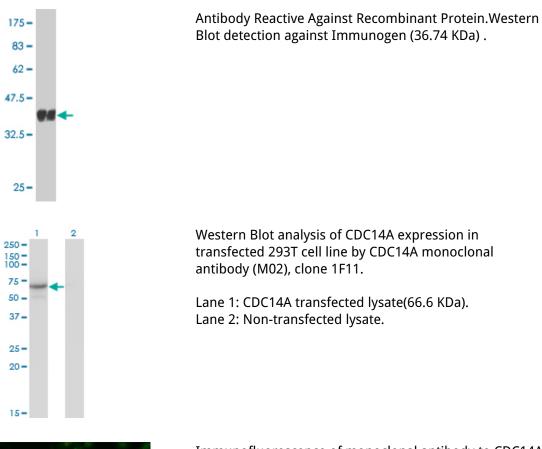

Background

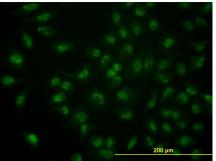

The protein encoded by this gene is a member of the dual specificity protein tyrosine phosphatase family. It is highly similar to Saccharomyces cerevisiae Cdc14, a protein tyrosine phosphatase involved in the exit of cell mitosis and initiation of DNA replication, suggesting a role in cell cycle control. This protein has been shown to interact with, and dephosphorylate tumor suppressor protein p53, and is thought to regulate the function of p53. Alternative splicing of this gene results in several transcript variants encoding distinct isoforms.
