

CDK4 Antibody (monoclonal) (M04)

Mouse monoclonal antibody raised against a partial recombinant CDK4. Catalog # AT1475a

Product Information

ApplicationWB, IF, EPrimary AccessionP11802Other AccessionBC003644ReactivityHuman, Mouse

HostmouseClonalitymonoclonalIsotypeIgG1 Kappa

Clone Names 2G7
Calculated MW 33730

Additional Information

Gene ID 1019

Other Names Cyclin-dependent kinase 4, Cell division protein kinase 4, PSK-J3, CDK4

Target/Specificity CDK4 (AAH03644, 211 a.a. ~ 303 a.a) partial recombinant protein with GST

tag. MW of the GST tag alone is 26 KDa.

Dilution WB~~1:500~1000 IF~~1:50~200 E~~N/A

Format Clear, colorless solution in phosphate buffered saline, pH 7.2.

Storage Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

Precautions CDK4 Antibody (monoclonal) (M04) is for research use only and not for use in

diagnostic or therapeutic procedures.

Background

The protein encoded by this gene is a member of the Ser/Thr protein kinase family. This protein is highly similar to the gene products of S. cerevisiae cdc28 and S. pombe cdc2. It is a catalytic subunit of the protein kinase complex that is important for cell cycle G1 phase progression. The activity of this kinase is restricted to the G1-S phase, which is controlled by the regulatory subunits D-type cyclins and CDK inhibitor p16(INK4a). This kinase was shown to be responsible for the phosphorylation of retinoblastoma gene product (Rb). Mutations in this gene as well as in its related proteins including D-type cyclins, p16(INK4a) and Rb were all found to be associated with tumorigenesis of a variety of cancers. Multiple polyadenylation sites of this gene have been reported.
