

# GMPS Antibody (monoclonal) (M01)

Mouse monoclonal antibody raised against a partial recombinant GMPS. Catalog # AT2223a

### **Product Information**

**Application** WB, IHC, E **Primary Accession** P49915 Other Accession NM 003875 Reactivity Human Host mouse Clonality monoclonal Isotype IgG1 Kappa **Clone Names** 1D10 **Calculated MW** 76715

### **Additional Information**

**Gene ID** 8833

Other Names GMP synthase [glutamine-hydrolyzing], GMP synthetase, Glutamine

amidotransferase, GMPS

Target/Specificity GMPS (NP\_003866, 108 a.a. ~ 215 a.a) partial recombinant protein with GST

tag. MW of the GST tag alone is 26 KDa.

**Dilution** WB~~1:500~1000 IHC~~1:100~500 E~~N/A

**Format** Clear, colorless solution in phosphate buffered saline, pH 7.2.

**Storage** Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

**Precautions** GMPS Antibody (monoclonal) (M01) is for research use only and not for use in

diagnostic or therapeutic procedures.

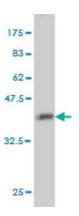

## **Background**

In the de novo synthesis of purine nucleotides, IMP is the branch point metabolite at which point the pathway diverges to the synthesis of either guanine or adenine nucleotides. In the guanine nucleotide pathway, there are 2 enzymes involved in converting IMP to GMP, namely IMP dehydrogenase (IMPD1), which catalyzes the oxidation of IMP to XMP, and GMP synthetase, which catalyzes the amination of XMP to GMP.
