

LMO2 Antibody (monoclonal) (M02)

18358

Mouse monoclonal antibody raised against a full length recombinant LMO2. Catalog # AT2723a

Product Information

Application WB **Primary Accession** P25791 **Other Accession** BC034041 Reactivity Human Host mouse Clonality monoclonal Isotype IgG1 Kappa **Clone Names** 2B3

Additional Information

Calculated MW

Gene ID 4005

Other Names Rhombotin-2, Cysteine-rich protein TTG-2, LIM domain only protein 2, LMO-2,

T-cell translocation protein 2, LMO2, RBTN2, RBTNL1, RHOM2, TTG2

Target/Specificity LMO2 (AAH34041, 1 a.a. ~ 158 a.a) full-length recombinant protein with GST

tag. MW of the GST tag alone is 26 KDa.

Dilution WB~~1:500~1000

Format Clear, colorless solution in phosphate buffered saline, pH 7.2.

Storage Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

Precautions LMO2 Antibody (monoclonal) (M02) is for research use only and not for use in

diagnostic or therapeutic procedures.

Background

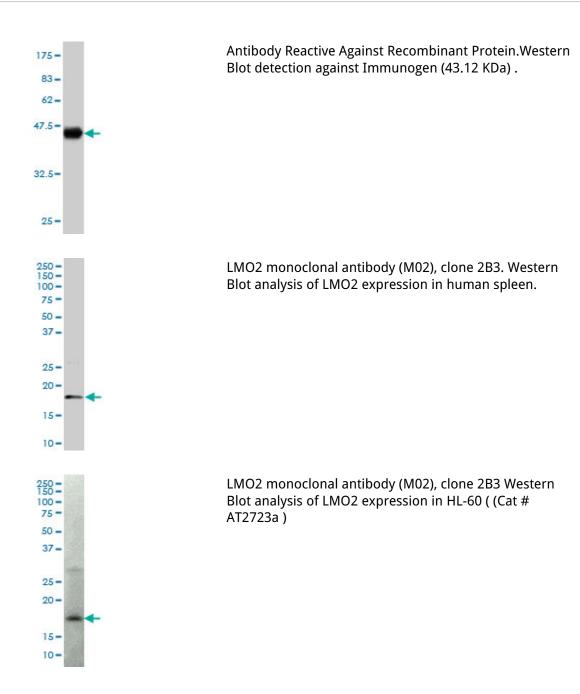

LMO2 encodes a cysteine-rich, two LIM-domain protein that is required for yolk sac erythropoiesis. The LMO2 protein has a central and crucial role in hematopoietic development and is highly conserved. The LMO2 transcription start site is located approximately 25 kb downstream from the 11p13 T-cell translocation cluster (11p13 ttc), where a number T-cell acute lymphoblastic leukemia-specific translocations occur. Alternative splicing results in multiple transcript variants encoding different isoforms.
