

NBL1 Antibody (monoclonal) (M01)

Mouse monoclonal antibody raised against a partial recombinant NBL1. Catalog # AT2975a

Product Information

Application	WB, E
Primary Accession	<u>P41271</u>
Other Accession	<u>NM_005380</u>
Reactivity	Human
Host	mouse
Clonality	monoclonal
Isotype	IgG2a Kappa
Clone Names	2G4
Calculated MW	19408

Additional Information

Gene ID	100532736;4681
Other Names	Neuroblastoma suppressor of tumorigenicity 1, DAN domain family member 1, Protein N03, Zinc finger protein DAN, NBL1, DAN, DAND1
Target/Specificity	NBL1 (NP_005371, 21 a.a. ~ 130 a.a) partial recombinant protein with GST tag. MW of the GST tag alone is 26 KDa.
Dilution	WB~~1:500~1000 E~~N/A
Format	Clear, colorless solution in phosphate buffered saline, pH 7.2 .
Storage	Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.
Precautions	NBL1 Antibody (monoclonal) (M01) is for research use only and not for use in diagnostic or therapeutic procedures.

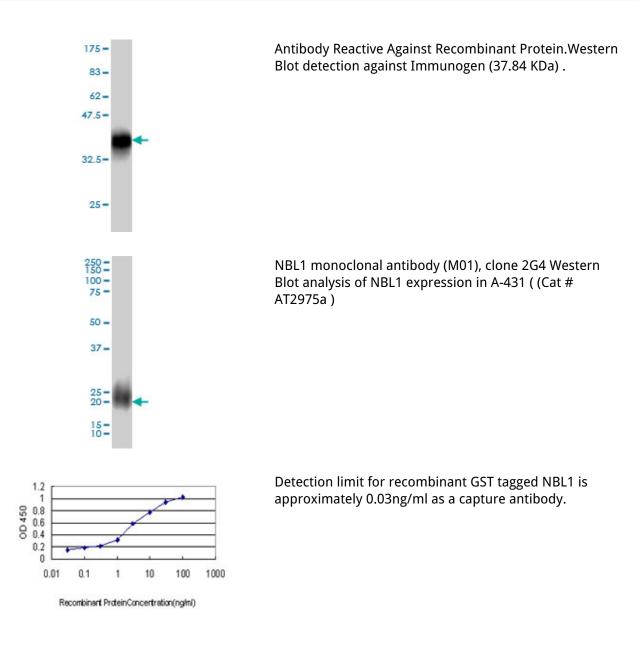

Background

This gene product is the founding member of the evolutionarily conserved CAN (Cerberus and DAN) family of proteins, which contain a domain resembling the CTCK (C-terminal cystine knot-like) motif found in a number of signaling molecules. These proteins are secreted, and act as BMP (bone morphogenetic protein) antagonists by binding to BMPs and preventing them from interacting with their receptors. They may thus play an important role during growth and development. Alternatively spliced transcript variants encoding distinct isoforms have been identified for this gene.
