

# PTPRS Antibody (monoclonal) (M01)

Mouse monoclonal antibody raised against a full length recombinant PTPRS. Catalog # AT3497a

### **Product Information**

Application WB
Primary Accession Q13332
Other Accession BC029496
Reactivity Human
Host mouse
Clonality monoclonal
Isotype IgG2b kappa

Clone Names 1H6 Calculated MW 217041

#### **Additional Information**

**Gene ID** 5802

Other Names Receptor-type tyrosine-protein phosphatase S, R-PTP-S, Receptor-type

tyrosine-protein phosphatase sigma, R-PTP-sigma, PTPRS

Target/Specificity PTPRS (AAH29496, 31 a.a. ~ 128 a.a) full-length recombinant protein with GST

tag. MW of the GST tag alone is 26 KDa.

**Dilution** WB~~1:500~1000

**Format** Clear, colorless solution in phosphate buffered saline, pH 7.2.

**Storage** Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

**Precautions** PTPRS Antibody (monoclonal) (M01) is for research use only and not for use in

diagnostic or therapeutic procedures.

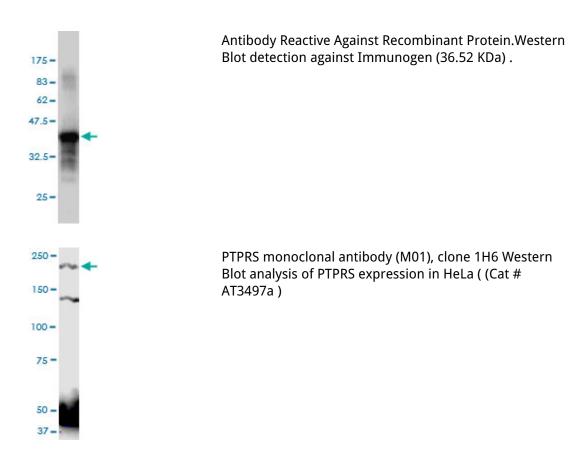

## **Background**

The protein encoded by this gene is a member of the protein tyrosine phosphatase (PTP) family. PTPs are known to be signaling molecules that regulate a variety of cellular processes including cell growth, differentiation, mitotic cycle, and oncogenic transformation. This PTP contains an extracellular region, a single transmembrane segment and two tandem intracytoplasmic catalytic domains, and thus represents a receptor-type PTP. The extracellular region of this protein is composed of multiple Ig-like and fibronectin type III-like domains. Studies of the similar gene in mice suggested that this PTP may be involved in cell-cell interaction, primary axonogenesis, and axon guidance during embryogenesis. This PTP has been also implicated in the molecular control of adult nerve repair. Four alternatively spliced transcript variants, which encode distinct proteins, have been reported.
