

SMAD1 Antibody (monoclonal) (M02)

Mouse monoclonal antibody raised against a partial recombinant SMAD1. Catalog # AT3936a

Product Information

Application WB, IHC, IF, E **Primary Accession** Q15797 **Other Accession** NM 005900 Reactivity Human Host mouse Clonality monoclonal Isotype IgG1 kappa **Clone Names** 1D3 Calculated MW 52260

Additional Information

Gene ID 4086

Other Names Mothers against decapentaplegic homolog 1, MAD homolog 1, Mothers

against DPP homolog 1, JV4-1, Mad-related protein 1, SMAD family member 1, SMAD 1, Smad1, hSMAD1, Transforming growth factor-beta-signaling protein

1, BSP-1, SMAD1, BSP1, MADH1, MADR1

Target/Specificity SMAD1 (NP_005891, 1 a.a. ~ 110 a.a) partial recombinant protein with GST

tag. MW of the GST tag alone is 26 KDa.

Dilution WB~~1:500~1000 IHC~~1:100~500 IF~~1:50~200 E~~N/A

Format Clear, colorless solution in phosphate buffered saline, pH 7.2.

Storage Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

Precautions SMAD1 Antibody (monoclonal) (M02) is for research use only and not for use

in diagnostic or therapeutic procedures.

Background

The protein encoded by this gene belongs to the SMAD, a family of proteins similar to the gene products of the Drosophila gene 'mothers against decapentaplegic' (Mad) and the C. elegans gene Sma. SMAD proteins are signal transducers and transcriptional modulators that mediate multiple signaling pathways. This protein mediates the signals of the bone morphogenetic proteins (BMPs), which are involved in a range of biological activities including cell growth, apoptosis, morphogenesis, development and immune responses. In response to BMP ligands, this protein can be phosphorylated and activated by the BMP receptor kinase. The phosphorylated form of this protein forms a complex with SMAD4, which is important for its function in the transcription regulation. This protein is a target for SMAD-specific E3 ubiquitin ligases, such as SMURF1

and SMURF2, and undergoes ubiquitination and proteasome-mediated degradation. Alternatively spliced transcript variants encoding the same protein have been observed.
