

TIMP1 Antibody (monoclonal) (M04)

Mouse monoclonal antibody raised against a full length recombinant TIMP1. Catalog # AT4242a

Product Information

Application E

Primary Accession
Other Accession
Reactivity
Human
Host
Clonality
Isotype
P01033
BC007097
Human
mouse
monoclonal
IgG2b Kappa

Clone Names 4E8 Calculated MW 23171

Additional Information

Gene ID 7076

Other Names Metalloproteinase inhibitor 1, Erythroid-potentiating activity, EPA, Fibroblast

collagenase inhibitor, Collagenase inhibitor, Tissue inhibitor of

metalloproteinases 1, TIMP-1, TIMP1, CLGI, TIMP

Target/Specificity TIMP1 (AAH07097, 1 a.a. ~ 169 a.a) full-length recombinant protein with GST

tag. MW of the GST tag alone is 26 KDa.

Dilution E~~N/A

Format Clear, colorless solution in phosphate buffered saline, pH 7.2.

Storage Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

Precautions TIMP1 Antibody (monoclonal) (M04) is for research use only and not for use

in diagnostic or therapeutic procedures.

Background

This gene belongs to the TIMP gene family. The proteins encoded by this gene family are natural inhibitors of the matrix metalloproteinases (MMPs), a group of peptidases involved in degradation of the extracellular matrix. In addition to its inhibitory role against most of the known MMPs, the encoded protein is able to promote cell proliferation in a wide range of cell types, and may also have an anti-apoptotic function. Transcription of this gene is highly inducible in response to many cytokines and hormones. In addition, the expression from some but not all inactive X chromosomes suggests that this gene inactivation is polymorphic in human females. This gene is located within intron 6 of the synapsin I gene and is transcribed in the opposite direction. [provided by RefSeq]

Please note: All products are 'FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC OR THERAPEUTIC PROCEDURES'.
