

APOD Antibody (N-term)

Purified Rabbit Polyclonal Antibody (Pab)

Catalog # AW5226

Product Information

Application	WB
Primary Accession	P05090
Other Accession	P23593 , P37153 , P51910
Reactivity	Human, Mouse
Predicted	Rat, Rabbit
Host	Rabbit
Clonality	Polyclonal
Calculated MW	21276
Isotype	Rabbit IgG
Antigen Source	HUMAN

Additional Information

Gene ID	347
Antigen Region	26-53
Other Names	APOD; Apolipoprotein D
Dilution	WB~~1:1000
Target/Specificity	This APOD antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 26-53 amino acids from the N-terminal region of human APOD.
Format	Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is prepared by Saturated Ammonium Sulfate (SAS) precipitation followed by dialysis against PBS.
Storage	Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.
Precautions	APOD Antibody (N-term) is for research use only and not for use in diagnostic or therapeutic procedures.

Protein Information

Name	APOD
Function	APOD occurs in the macromolecular complex with lecithin- cholesterol acyltransferase. It is probably involved in the transport and binding of bilin.

Appears to be able to transport a variety of ligands in a number of different contexts.

Cellular Location

Secreted.

Tissue Location

Expressed in liver, intestine, pancreas, kidney, placenta, adrenal, spleen, fetal brain tissue and tears

Background

APOD is a component of high density lipoprotein that has no marked similarity to other apolipoprotein sequences. It has a high degree of homology to plasma retinol-binding protein and other members of the alpha 2 microglobulin protein superfamily of carrier proteins, also known as lipocalins. This glycoprotein is closely associated with the enzyme lecithin:cholesterol acyltransferase - an enzyme involved in lipoprotein metabolism.

Images

Western blot analysis of lysates from human liver, mouse liver tissue lysate (from left to right), using APOD Antibody (N-term)(Cat. #AW5226). AW5226 was diluted at 1:1000 at each lane. A goat anti-rabbit IgG H&L(HRP) at 1:10000 dilution was used as the secondary antibody.
