

# ENOA Antibody (C-term)

Purified Rabbit Polyclonal Antibody (Pab)

Catalog # AW5277

## Product Information

---

<b>Application</b>	IHC-P, IF, FC, WB
<b>Primary Accession</b>	<a href="#">P06733</a>
<b>Other Accession</b>	<a href="#">Q4R5L2</a>
<b>Reactivity</b>	Human, Mouse
<b>Predicted</b>	Rat, Monkey
<b>Host</b>	Rabbit
<b>Clonality</b>	Polyclonal
<b>Calculated MW</b>	47169
<b>Isotype</b>	Rabbit IgG
<b>Antigen Source</b>	HUMAN

## Additional Information

---

<b>Gene ID</b>	2023
<b>Antigen Region</b>	405-434
<b>Other Names</b>	ENO1; ENO1L1; MBPB1; MPB1; Alpha-enolase; 2-phospho-D-glycerate hydro-lyase; C-myc promoter-binding protein; Enolase 1; MBP-1; MPB-1; Non-neural enolase; Phosphopyruvate hydratase; Plasminogen-binding protein
<b>Dilution</b>	IHC-P~~1:100~500 IF~~1:10~50 FC~~1:10~50 WB~~1:1000
<b>Target/Specificity</b>	This ENOA antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 405-434 amino acids from the C-terminal region of human ENOA.
<b>Format</b>	Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is prepared by Saturated Ammonium Sulfate (SAS) precipitation followed by dialysis against PBS.
<b>Storage</b>	Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.
<b>Precautions</b>	ENOA Antibody (C-term) is for research use only and not for use in diagnostic or therapeutic procedures.

## Protein Information

---

<b>Name</b>	ENO1
-------------	------

<b>Synonyms</b>	ENO1L1, MBPB1, MPB1
<b>Function</b>	Glycolytic enzyme the catalyzes the conversion of 2- phosphoglycerate to phosphoenolpyruvate (PubMed: <a href="#">1369209</a> , PubMed: <a href="#">29775581</a> ). In addition to glycolysis, involved in various processes such as growth control, hypoxia tolerance and allergic responses (PubMed: <a href="#">10802057</a> , PubMed: <a href="#">12666133</a> , PubMed: <a href="#">2005901</a> , PubMed: <a href="#">29775581</a> ). May also function in the intravascular and pericellular fibrinolytic system due to its ability to serve as a receptor and activator of plasminogen on the cell surface of several cell-types such as leukocytes and neurons (PubMed: <a href="#">12666133</a> ). Stimulates immunoglobulin production (PubMed: <a href="#">1369209</a> ).
<b>Cellular Location</b>	Cytoplasm. Cell membrane. Cytoplasm, myofibril, sarcomere, M line. Note=Can translocate to the plasma membrane in either the homodimeric (alpha/alpha) or heterodimeric (alpha/gamma) form. ENO1 is localized to the M line
<b>Tissue Location</b>	The alpha/alpha homodimer is expressed in embryo and in most adult tissues. The alpha/beta heterodimer and the beta/beta homodimer are found in striated muscle, and the alpha/gamma heterodimer and the gamma/gamma homodimer in neurons

## Background

ENO1 is one of three enolase isoenzymes found in mammals; the protein alpha-enolase, a homodimeric soluble enzyme, and is also a shorter monomeric structural lens protein, tau-crystallin. The two proteins are made from the same message. The full length protein, the isoenzyme, is found in the cytoplasm. The shorter protein is produced from an alternative translation start, is localized to the nucleus, and has been found to bind to an element in the c-myc promoter.

## Images

Western blot analysis of lysates from mouse brain tissue, U-251 MG, Jurkat, MCF-7 cell line (from left to right), using ENO1 Antibody (C-term) (Cat. #AW5277). AW5277 was diluted at 1:1000 at each lane. A goat anti-rabbit IgG H&L (HRP) at 1:10000 dilution was used as the secondary antibody.

ENO1 Antibody (C-term) (Cat. #AW5277) flow cytometry analysis of Ramos cells (bottom histogram) compared to a negative control cell (top histogram). FITC-conjugated goat-anti-rabbit secondary antibodies were used for the analysis.

Confocal immunofluorescent analysis of ENOA Antibody (C-term)(Cat#AW5277) with Hela cell followed by Alexa Fluor 488-conjugated goat anti-rabbit IgG (green).Actin filaments have been labeled with Alexa Fluor 555 phalloidin (red).DAPI was used to stain the cell nuclear (blue).

ENOA Antibody (C-term) (Cat. #AW5277)immunohistochemistry analysis in formalin fixed and paraffin embedded human kidney tissue followed by peroxidase conjugation of the secondary antibody and DAB staining.This data demonstrates the use of ENOA Antibody (C-term) for immunohistochemistry. Clinical relevance has not been evaluated.

Please note: All products are 'FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC OR THERAPEUTIC PROCEDURES'.
