

ENG Antibody (C-term)

Purified Rabbit Polyclonal Antibody (Pab) Catalog # AW5341

Product Information

Application WB **Primary Accession** P17813 Reactivity Human Host Rabbit Polyclonal Clonality **Calculated MW** 70578 Isotype Rabbit IgG **Antigen Source HUMAN**

Additional Information

Gene ID 2022

Antigen Region 554-587

Other Names Endoglin, CD105, ENG, END

Dilution WB~~1:1000

Target/Specificity This ENG antibody is generated from a rabbit immunized with a KLH

conjugated synthetic peptide between 554-587 amino acids from the

C-terminal region of human ENG.

Format Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide.

This antibody is purified through a protein A column, followed by peptide

affinity purification.

Storage Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store

at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions ENG Antibody (C-term) is for research use only and not for use in diagnostic

or therapeutic procedures.

Protein Information

Name ENG

Synonyms END

Function Vascular endothelium glycoprotein that plays an important role in the

regulation of angiogenesis (PubMed:<u>21737454</u>, PubMed:<u>23300529</u>). Required

for normal structure and integrity of adult vasculature (PubMed:7894484). Regulates the migration of vascular endothelial cells (PubMed:17540773). Required for normal extraembryonic angiogenesis and for embryonic heart development (By similarity). May regulate endothelial cell shape changes in response to blood flow, which drive vascular remodeling and establishment of normal vascular morphology during angiogenesis (By similarity). May play a critical role in the binding of endothelial cells to integrins and/or other RGD receptors (PubMed:1692830). Acts as a TGF-beta coreceptor and is involved in the TGF-beta/BMP signaling cascade that ultimately leads to the activation of SMAD transcription factors (PubMed:21737454, PubMed:22347366, PubMed:23300529, PubMed:8370410). Required for GDF2/BMP9 signaling through SMAD1 in endothelial cells and modulates TGFB1 signaling through SMAD3 (PubMed:21737454, PubMed:22347366, PubMed:23300529).

Cellular Location

Cell membrane; Single-pass type I membrane protein

Tissue Location

Detected on umbilical veil endothelial cells (PubMed:10625079). Detected in placenta (at protein level) (PubMed:1692830). Detected on endothelial cells (PubMed:1692830)

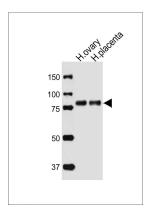

Background

Major glycoprotein of vascular endothelium. Involved in the regulation of angiogenesis. May play a critical role in the binding of endothelial cells to integrins and/or other RGD receptors. Acts as TGF-beta coreceptor and is involved in the TGF- beta/BMP signaling cascade. Required for GDF2/BMP9 signaling through SMAD1 in endothelial cells and modulates TGF-beta1 signaling through SMAD3.

Images

Western blot analysis of lysates from human ovary, human placenta tissue lysate (from left to right), using ENG Antibody (C-term)(Cat. #AW5341). AW5341 was diluted at 1:1000 at each lane. A goat anti-rabbit IgG H&L(HRP) at 1:10000 dilution was used as the secondary antibody. Lysates at 20ug per lane.
