

(Mouse) Dpf2 Antibody (Center)

Purified Rabbit Polyclonal Antibody (Pab) Catalog # AW5483

Product Information

Application WB Primary Accession Q61103

Reactivity Human, Mouse

Host Rabbit
Clonality Polyclonal
Calculated MW 44230
Isotype Rabbit IgG
Antigen Source HUMAN

Additional Information

Gene ID 19708

Antigen Region 125-159

Other Names Zinc finger protein ubi-d4, Apoptosis response zinc finger protein,

BRG1-associated factor 45D, BAF45D, D4, zinc and double PHD fingers family

2, Protein requiem, Dpf2, Baf45d, Req, Ubid4

Dilution WB~~1:1000

Target/Specificity This mouse Dpf2 antibody is generated from a rabbit immunized with a KLH

conjugated synthetic peptide between 125-159 amino acids from the Central

region of mouse Dpf2.

Format Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide.

This antibody is purified through a protein A column, followed by peptide

affinity purification.

Storage Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store

at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions (Mouse) Dpf2 Antibody (Center) is for research use only and not for use in

diagnostic or therapeutic procedures.

Protein Information

Name Dpf2

Synonyms Baf45d, Req, Ubid4

Function Plays an active role in transcriptional regulation by binding modified

histones H3 and H4. Is a negative regulator of myeloid differentiation of hematopoietic progenitor cells (By similarity). Might also have a role in the development and maturation of lymphoid cells (PubMed: 7961935). Involved in the regulation of non-canonical NF- kappa-B pathway (By similarity).

Cellular Location Nucleus {ECO:0000250 | UniProtKB:Q92785}. Cytoplasm

{ECO:0000250 | UniProtKB:Q92785}

Tissue Location In embryo, highest levels are seen in brain, eyes, thymus and olfactory

epithelium in nose, whereas several other tissues, including the musculoskeletal system, show moderate expression. In adult, higher expression in testis, medium in thymus and spleen, lower in certain parts of the brain as the hippocampus. No expression in adult heart, lung, liver,

duodenum and kidney

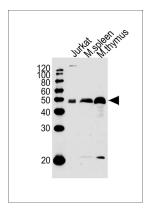

Background

May be a transcription factor required for the apoptosis response following survival factor withdrawal from myeloid cells. Might also have a role in the development and maturation of lymphoid cells.
