

CD40L/CD154/TRAP

Catalog # PVGS1012

Product Information

Primary Accession P29965
Species Human

Sequence Met113-Leu261

Purity > 95% as analyzed by SDS-PAGE

> 95% as analyzed by RP-HPLC

> 95% as analyzed by Anion-exchange FPLC

Endotoxin Level

Biological Activity Recombinant human CD40 Ligand (CD40L/CD154/TRAP) is fully biologically

active when compared to standard. The ED_{50} as determined by the dose-dependant stimulation of IL-12 & IL-8 induction by PMB (Peripheral Mononuclear) cells was found to be 5.0-10.0 ng/ml, corresponding to a

Specific Activity of 1.0 x 10⁵ IU/mg.

Expression System E. coli

Theoretical Molecular Weight 16.3 kDa

Formulation Lyophilized after extensive dialysis against 50 mM Tris-HCl, pH 8.0, 250 mM

NaCl buffer.

Reconstitution It is recommended that this vial be briefly centrifuged prior to opening to

bring the contents to the bottom. Reconstitute the lyophilized powder in

sterile 18 M Ω -cm H₂O up to 100 \Box g/ml.

Storage & Stability Upon receiving, this product remains stable for up to 6 months at -70°C or

-20°C. Upon reconstitution, the product should be stable for up to 1 week at

4°C or up to 3 months at -20°C. Avoid repeated freeze-thaw cycles.

Additional Information

Gene ID 959

Other Names CD40 ligand, CD40-L, T-cell antigen Gp39, TNF-related activation protein,

TRAP, Tumor necrosis factor ligand superfamily member 5, CD154, CD40 ligand, membrane form, CD40 ligand, soluble form, sCD40L, CD40LG, CD40L,

TNFSF5, TRAP

Target Background CD40 Ligand (CD40L/CD154/TRAP) is a membrane glycoprotein and

differentiation antigen expressed on the surface of T-cells. The CD40 ligand stimulates B-cell proliferation and secretion of all immunoglobulin isotypes in the presence of cytokines. It also costimulates proliferation of activated T-cell and this is accompanied by the production of IFN-y, TNF- α , and IL2. CD40

ligand has been shown to induce cytokine production and tumoricidal activity in peripheral blood monocytes.

Protein Information

Name CD40LG

Synonyms CD40L, TNFSF5, TRAP

Function Cytokine that acts as a ligand to CD40/TNFRSF5 (PubMed: 1280226,

PubMed:<u>31331973</u>). Costimulates T-cell proliferation and cytokine production (PubMed:<u>8617933</u>). Its cross-linking on T-cells generates a costimulatory signal which enhances the production of IL4 and IL10 in conjunction with the TCR/CD3 ligation and CD28 costimulation (PubMed:<u>8617933</u>). Induces the activation of NF-kappa-B (PubMed:<u>15067037</u>, PubMed:<u>31331973</u>). Induces the activation of kinases MAPK8 and PAK2 in T-cells (PubMed:<u>15067037</u>). Induces tyrosine phosphorylation of isoform 3 of CD28 (PubMed:<u>15067037</u>). Mediates B-cell proliferation in the absence of co-stimulus as well as IgE production in the presence of IL4 (By similarity). Involved in immunoglobulin class switching

(By similarity).

Cellular Location Cell membrane; Single-pass type II membrane protein. Cell surface

Tissue Location Specifically expressed on activated CD4+ T- lymphocytes
