

## SDF-1β/CXCL12 Catalog # PVGS1117

## **Product Information**

Primary Accession P40224
Species Mouse

Sequence Lys22-Met93

**Purity** > 97% as analyzed by SDS-PAGE

> 97% as analyzed by HPLC

**Endotoxin Level** 

**Biological Activity** Fully biologically active when compared to standard. The biological activity

determined by a chemotaxis bioassay using human peripheral blood

monocytes is in a concentration range of 50.0-100.0 ng/ml.

**Expression System** E. coli

Theoretical Molecular Weight 8.5 kDa

**Formulation** Lyophilized from a 0.2 Im filtered solution in 20 mM PB, pH 7.4, 150 mM

NaCl.

**Reconstitution** It is recommended that this vial be briefly centrifuged prior to opening to

bring the contents to the bottom. Reconstitute the lyophilized powder in sterile distilled water or aqueous buffer containing 0.1 % BSA to a

concentration of 0.1-1.0 mg/ml.

Storage & Stability Upon receiving, this product remains stable for up to 6 months at -70°C or

-20°C. Upon reconstitution, the product should be stable for up to 1 week at

4°C or up to 3 months at -20°C. Avoid repeated freeze-thaw cycles.

## **Additional Information**

Gene ID 20315

**Other Names** Stromal cell-derived factor 1, SDF-1, 12-O-tetradecanoylphorbol 13-acetate

repressed protein 1, TPAR1, C-X-C motif chemokine 12, Pre-B cell

growth-stimulating factor, PBSF, Thymic lymphoma cell-stimulating factor,

TLSF, Cxcl12, Sdf1

**Target Background** Stromal-Cell Derived Factor-1 beta (SDF-1β), also known as SCYB12, PBSF and

CXCL12, is an 8.3 kDa, heparin-binding member of the CXC (or alpha) family of

chemokines and signal through the CXCR4 receptor. SDF-1 $\alpha$  and  $\beta$  are reported to be monomers at neutral pH and physiologic ionic strength, On the cell surface, this may well facilitate SDF-1 interaction with its two receptors, CXCR4 and syndecan4. Heparin sulfate is known to protect SDF-1 from proteolysis, and CXCR4 exists constitutively as a dimer. Among its many

functions, CXCL12 is known to influence lymphopoiesis, regulate patterning and cell number of neural progenitors, and promote angiogenesis (12, 13). It also enhances the survival of myeloid progenitor cells

## **Protein Information**

Name Cxcl12

Synonyms Sdf1

**Function** Chemoattractant active on T-lymphocytes and monocytes but not

neutrophils. Activates the C-X-C chemokine receptor CXCR4 to induce a rapid and transient rise in the level of intracellular calcium ions and chemotaxis. Also binds to atypical chemokine receptor ACKR3, which activates the beta-arrestin pathway and acts as a scavenger receptor for SDF-1. Binds to the allosteric site (site 2) of integrins and activates integrins ITGAV:ITGB3, ITGA4:ITGB1 and ITGA5:ITGB1 in a CXCR4-independent manner (By similarity). Acts as a positive regulator of monocyte migration and a negative regulator of monocyte adhesion via the LYN kinase. Stimulates migration of monocytes and T-lymphocytes through its receptors, CXCR4 and ACKR3, and decreases monocyte adherence to surfaces coated with ICAM-1, a ligand for beta-2 integrins. SDF1A/CXCR4 signaling axis inhibits beta-2 integrin LFA-1 mediated adhesion of monocytes to ICAM-1 through LYN kinase. Plays a protective role after myocardial infarction. Induces down-regulation and internalization of ACKR3 expressed in various cells (By similarity). Has several critical functions during embryonic development; required for B-cell lymphopoiesis, myelopoiesis in bone marrow and heart ventricular septum formation. Stimulates the proliferation of bone marrow-derived B-cell progenitors in the presence of IL7 as well as growth of stromal cell-dependent pre-B-cells (PubMed:8134392).

Secreted.

**Cellular Location** 

**Tissue Location** Highest expression levels detected in kidney, liver, spleen and muscle.

Isoform Alpha is expressed ubiquitously but at varying levels, while isoform Beta displays tissue-specific expression, with expression detected in kidney, liver, heart, spleen and muscle but not in lung, colon, brain, skin and stomach

Please note: All products are 'FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC OR THERAPEUTIC PROCEDURES'.
