

IL-6 Catalog # PVGS1262

Product Information

Primary Accession Species	<u>P20607-1</u> Rat
Sequence	Phe25-Thr211
Purity	> 95% as analyzed by SDS-PAGE
Endotoxin Level Biological Activity Expression System	ED ₅₀ HEK 293
Formulation Reconstitution	Lyophilized after extensive dialysis against PBS. It is recommended that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Reconstitute the lyophilized powder in ddH ₂ O or PBS up to 100 g/ml.
Storage & Stability	Upon receiving, this product remains stable for up to 6 months at lower than -70°C. Upon reconstitution, the product should be stable for up to 1 week at 4°C or up to 3 months at -20°C. For long term storage it is recommended that a carrier protein (example 0.1% BSA) be added. Avoid repeated freeze-thaw cycles.

Additional Information

Target BackgroundInterleukin-6 (IL-6), also known as BSF-2, CDF and IFNB2, is a pleiotropic
cytokine that participates in both pro-inflammatory and anti-inflammatory
responses. It is produced mainly by T cells, macrophages, monocytes,
endothelial cells and muscle cells. IL-6 binds to IL-6 receptor (IL-6R) to trigger
the association of IL-6R with gp130, inducing signal transduction through JAKs
and STATs. The biological functions of IL-6 are diverse. It stimulates B cell
differentiation and antibody production, myeloma and plasmacytoma growth,
and nerve cell differentiation. It also acts as a myokine, produced by muscle
cells in response to muscle contraction and released into the blood stream to
help break down fats and improve insulin resistance.

Protein Information
