

6Ckine/CCL21

Catalog # PVGS1466

Product Information

Primary Accession P02775
Species Rat

Sequence Ser24-Gln133

Purity > 95% as analyzed by SDS-PAGE

Endotoxin Level

Biological Activity The EC₅₀ value of Rat 6Ckine/CCL21 on Ca²⁺ mobilization assay in

CHO-K1/G15/h_CCR7 pool (human G15 and human CCR7 stably expressed in

CHO-K1 cells) is less than 1.0 ☐g/ml.

Expression System CHO

Formulation Lyophilized from a 0.2 Im filtered solution in PBS.

Reconstitution It is recommended that this vial be briefly centrifuged prior to opening to

bring the contents to the bottom. Reconstitute the lyophilized powder in

ddH₂O or PBS up to 100 □g/ml.

Storage & Stability Upon receiving, this product remains stable for up to 6 months at lower than

-70°C. Upon reconstitution, the product should be stable for up to 1 week at 4°C or up to 3 months at -20°C. For long term storage it is recommended that a carrier protein (example 0.1% BSA) be added. Avoid repeated freeze-thaw

cycles.

Additional Information

Gene ID 5473

Other Names Platelet basic protein, PBP, C-X-C motif chemokine 7, Leukocyte-derived

growth factor, LDGF, Macrophage-derived growth factor, MDGF,

Small-inducible cytokine B7, Connective tissue-activating peptide III, CTAP-III,

LA-PF4, Low-affinity platelet factor IV, TC-2, Connective tissue-activating peptide III(1-81), CTAP-III(1-81), Beta-thromboglobulin, Beta-TG,

peptide III(1-01), CIAI-III(1-01), Deta-tillollibogioballii, Deta-ta,

Neutrophil-activating peptide 2(74), NAP-2(74), Neutrophil-activating peptide

2(73), NAP-2(73), Neutrophil-activating peptide 2, NAP-2, TC-1,

Neutrophil-activating peptide 2(1-66), NAP-2(1-66), Neutrophil-activating peptide 2(1-63), NAP-2(1-63), PPBP, CTAP3, CXCL7, SCYB7, TGB1, THBGB1

Target Background Chemokine (C-C motif) ligand 21 (CCL21) is a small cytokine belonging to the

CC chemokine family. This chemokine is also known as 6Ckine, exodus-2, and secondary lymphoid-tissue chemokine (SLC). CCL21 contains four conserved cysteines characteristic of β chemokines plus two additional cysteines in an unusually long carboxyl-terminal domain. It is expressed in lymphatic

endothelial cells and the spleen. CCL21 chemoattracts T and B lymphocytes and inhibits hematopoiesis. It can signal through the CCR7 receptor.

Protein Information

Name PPBP

Synonyms CTAP3, CXCL7, SCYB7, TGB1, THBGB1

Function LA-PF4 stimulates DNA synthesis, mitosis, glycolysis, intracellular cAMP

accumulation, prostaglandin E2 secretion, and synthesis of hyaluronic acid and sulfated glycosaminoglycan. It also stimulates the formation and

secretion of plasminogen activator by human synovial cells. NAP-2 is a ligand for CXCR1 and CXCR2, and NAP-2, NAP-2(73), NAP-2(74), NAP-2(1-66), and most potent NAP-2(1-63) are chemoattractants and activators for neutrophils. TC-1 and TC-2 are antibacterial proteins, in vitro released from activated platelet alpha-granules. CTAP-III(1-81) is more potent than CTAP-III

desensitize chemokine-induced neutrophil activation.

Cellular Location Secreted.
