

## $\begin{array}{l} MIP\text{-}1\beta \\ \text{Catalog \# PVGS1485} \end{array}$

## **Product Information**

**Sequence** Ala<sup>24</sup>-Asn<sup>92</sup> (Accession #: P13236.1)

**Purity** > 95% as analyzed by SDS-PAGE and HPLC.

**Endotoxin Level** 

**Formulation** Lyophilized after extensive dialysis against PBS. **Reconstitution** Reconstituted in ddH<sub>2</sub>O or PBS at 100 [g/ml.

## **Additional Information**

**Target Background** 

Macrophage inflammatory protein 1 beta (MIP-1 $\beta$ ), also known as Chemokine (C-C motif) ligand 4 (CCL4), is a small cytokine belonging to the CC chemokine family. It is a chemo attractant for natural killer cells, monocytes and a variety of other immune cells. MIP-1 $\beta$  is a major HIV-suppressive factor produced by CD8+ T cells. Perforin-low memory CD8+ T cells are the most common T-cells that normally synthesize MIP-1-beta in humans. MIP-1 $\beta$  has been shown to interact with CCL3. It can signal through the CCR5 receptor.

Recombinant MIP-1 beta/CCL4 produced in CHO is a polypeptide chain containing 69 amino acids. A fully biologically active molecule, rhMIP-1 beta/CCL4 has a molecular mass of 10-19 kDa analyzed by reducing SDS-PAGE

and is obtained by chromatographic techniques at .
