

Nectin-2/CD112

Catalog # PVGS1619

Product Information

Primary Accession 092692-2 **Species** Human

Sequence Gln32-Leu360

Purity > 90% as analyzed by SDS-PAGE

Endotoxin Level

Expression System HEK 293

Formulation Lyophilized from a 0.2 Im filtered solution in PBS.

Reconstitution It is recommended that this vial be briefly centrifuged prior to opening to

bring the contents to the bottom. Reconstitute the lyophilized powder in

ddH₂O or PBS up to 100 ☐g/ml.

Storage & Stability Upon receiving, this product remains stable for up to 6 months at lower than

> -70°C. Upon reconstitution, the product should be stable for up to 1 week at 4°C or up to 3 months at -20°C. For long term storage it is recommended that a carrier protein (example 0.1% BSA) be added. Avoid repeated freeze-thaw

cycles.

Additional Information

Target Background

Nectin-2, also known as CD112 (Cluster of Differentiation 226) and PVRL2 (Poliovirus receptor-related 2), is a human plasma membrane glycoprotein. This protein is a modulator of T-cell signaling and can be either a costimulator of T-cell function or a coinhibitor, depending on the receptor it binds to. Upon binding to CD226, it stimulates T-cell proliferation and cytokine production, including that of IL-2, IL-5, IL-10, IL-13, and IFNy. It can also inhibit T-cell proliferation upon interaction with PVRIG. Nectin-2 also acts as a receptor for herpes simplex virus 1 (HHV-1) mutant Rid1, herpes simplex virus 1 (HHV-2) and pseudorabies virus (PRV).
