CLDN18.2

Catalog # PVGS1623

Product Information

Primary Accession	P56856-2
Species	Human
Sequence	Full length
Purity	> 80% as analyzed by SDS-PAGE
Biological Activity	Immobilized CLDN18.2, His, Human (Cat. No.: Z03504) at 1.0 μg/mL (100 μl/well). Dose response curve for anti-Claudin 18.2 Antibody with the EC_{50} of 13.75ng/mL determined by ELISA.
Expression System	Insect Cells
Theoretical Molecular Weight	27.7 kDa
Formulation	Supplied as a solution in 50 mM Hepes, 500 mM NaCl, 10% glycerol, 0.2% DDM, 0.04% CHS, pH 7.5.
Storage & Stability	Upon receiving, this product remains stable for up to 6 months at -80°C. Please avoid repeated freeze-thaw cycles.

Additional Information

Target Background	Claudin-18 is a protein that in humans is encoded by the CLDN18 gene. CLDN18 belongs to the large claudin family of proteins, which form tight junction strands in epithelial cells. The Expression of Isoform A2 (CLDN18.2) is restricted to the stomach mucosa where it is predominantly observed in the epithelial cells of the pit region and the base of the gastric glands including exocrine and endocrine cells (at protein level). CLDN18.2 is founded to be abundant in gastric tumors, Experimental antibody IMAB362 targets Claudin 18.2 to help treat gastric cancers.

Protein Information
