

PDGF-BB

Catalog # PVGS1685

Product Information

Primary Accession B1H0W5
Species Bovine

Sequence Ser82-Thr190

Purity ≥ 95% as analyzed by SDS-PAGE

Endotoxin Level

Biological Activity ED_{50 50}, the calculated specific activity is approximately $> 0.5 \times 10^5$ IU/mg. It is

recommended to experimentally determine the optimal concentration for

each specific application by performing a dose response assay.

Expression System P. pastoris

Theoretical Molecular Weight 12 kDa

Formulation Lyophilized from a 0.2 Im filtered solution in 20 mM NaAc, pH 5.0.

Reconstitution Before opening, centrifuge the vial briefly to bring the contents to the bottom.

Reconstitute the lyophilized powder in ddH_2O up to 100 \lg/ml .

Storage & Stability Upon receiving, the lyophilized product remains stable for up to 6 months at

lower than -70 °C. Upon reconstitution, the product is stable for up to 1 week at 4 °C or up to 3 months at -20 °C. Avoid repeated freeze-thaw cycles by

making single-use aliquots before the solution is storage at -20 °C.

Additional Information

Target Background Platelet-derived growth factor (PDGF) presenting in serum but absent from

plasma was first discovered in an animal study by Lynch and co-workers in the late 1980s. It is a disulfide-linked dimer consisting of two peptides-chain A and chain B. PDGF has three subforms: PDGF-AA, PDGF-BB, and PDGF-AB. It is involved in many biological processes, including hyperplasia, embryonic neuron development, chemotaxis, and respiratory tubule epithelial cell development. The function of PDGF is mediated by two receptors (PDGFR- α

and PDGFR-β).
