

CD3E&CD3D

Catalog # PVGS1847

Product Information

Primary Accession P07766 (CD3E)&P04234 (CD3D)

Species Human

Sequence Asp23-Asp126 (CD3E)&Phe22-Ala105 (CD3D)

> 95% as determined by Bis-Tris PAGE **Purity**

> 95% as determined by HPLC

Endotoxin Level Less than 1EU per Ig by the LAL method.

Biological Activity Measured by its binding ability in a functional ELISA. Immobilized

CD3E&CD3D [Biotin], His, Human at 0.5 g/ml (100 gl/well) on the streptavidin

precoated plate (5 [g/ml) can bind OKT3, mFc Tag. Test result was

comparable to standard batch.

HEK293 Expression System

Theoretical Molecular Weight 17.9 kDa (CD3E) and 16.7 kDa (CD3D)

Formulation

Lyophilized from a 0.22 Im filtered solution in PBS, (pH 7.4). Reconstitution

Centrifuge the tube before opening. Reconstituting to a concentration more than 100 [g/ml is recommended. Dissolve the lyophilized protein in distilled

water.

Storage & Stability Upon receiving, the product remains stable up to 6 months at -20 °C or below.

Upon reconstitution, the product should be stable for 3 months at -80 °C.

Avoid repeated freeze-thaw cycles.

Additional Information

T-cell surface glycoprotein CD3 epsilon&CD3 delta chain, also known as **Target Background**

> CD3E&CD3D, are single-pass type I membrane proteins. When antigen presenting cells (APCs) activate T-cell receptor (TCR), TCR-mediated signals are transmitted across the cell membrane by the CD3 chains CD3D, CD3E, CD3G and CD3Z. All CD3 chains contain immunoreceptor tyrosine-based activation

motifs (ITAMs) in their cytoplasmic domain.

Protein Information

Please note: All products are 'FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC OR THERAPEUTIC PROCEDURES'.
