

CD19

Catalog # PVGS1924

Product Information

Primary Accession P15391-1
Species Human

Sequence Pro20-Lys291

Purity > 95% as determined by Bis-Tris PAGE

Endotoxin Level Less than 1EU per Ig by the LAL method.

Biological Activity Measured by its binding ability in a functional ELISA. Immobilized CD19, His,

Human at 2 [g/ml (100 []/well) on the plate can bind Coltuximab, hFc Tag. Measured by its binding ability in a functional ELISA. Immobilized CD19, His, Human at 2 [g/ml (100 []/well) on the plate can bind FMC63, mFc Tag. Test

result was comparable to standard batch.

Expression System HEK293

Theoretical Molecular Weight 34.7 kDa

FormulationLyophilized from a 0.22 Im filtered solution in PBS, (pH 7.4). **Reconstitution**Centrifuge the tube before opening. Reconstituting to a conce

econstitutionCentrifuge the tube before opening. Reconstituting to a concentration more than 100 [g/ml is recommended. Dissolve the lyophilized protein in distilled

water.

Storage & Stability Upon receiving, the product remains stable up to 6 months at -20 °C or below.

Upon reconstitution, the product should be stable for 3 months at -80 °C.

Avoid repeated freeze-thaw cycles.

Additional Information

Target Background CD19 is a 95 kDa transmembrane glycoprotein that plays a central role in B

cell activation and humoral immune responses. Functions as coreceptor for the B-cell antigen receptor complex (BCR) on B-lymphocytes. Decreases the threshold for activation of downstream signaling pathways and for triggering B-cell responses to antigens. Activates signaling pathways that lead to the activation of phosphatidylinositol 3-kinase and the mobilization of

intracellular Ca2 stores.

intracentular Caz Stores.
